1   Introduction

Red&BlueBT for Nokia Series 60 is a classic Othello/Reversi game for all people in any age. It has very cute animation to refresh you another feeling about this simple and traditional board game. We have the 1-player and 2-player selection version that can be played together with your friend over your phone built-in Bluetooth connectivity.

Features:

- 1-player and 2-player selection over Bluetooth Connectivity
- 3 difficulty levels in 1-player mode against Phone: Easy, Normal and Hard
- Excellent audio and cute animation
- Hi-score scheme

2   System Requirements

- Nokia 7650 or 3650, minimum 420k storage, 650K free memory to run
- A PC desktop with Nokia 7650/3650 PC Suite installed (optional)
- Infra-Red/Bluetooth connection between your PC and the Nokia 7650/3650

The **RedBlueBTNS60_101_EN.SIS** application has been tested on Nokia 7650 (English) with software versions 3.12 and 3.16
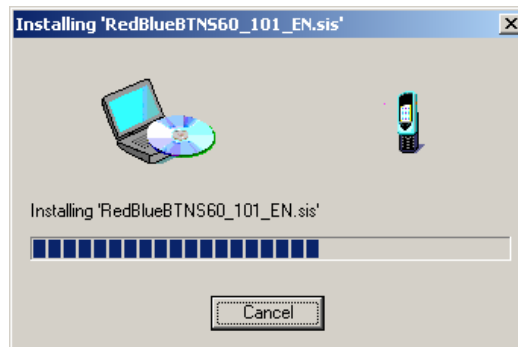

Note:

We are using the full version throughout the document. If you are installing the Trial version, the filename is **RedBlueBTNS60_101Trial_EN.SIS**
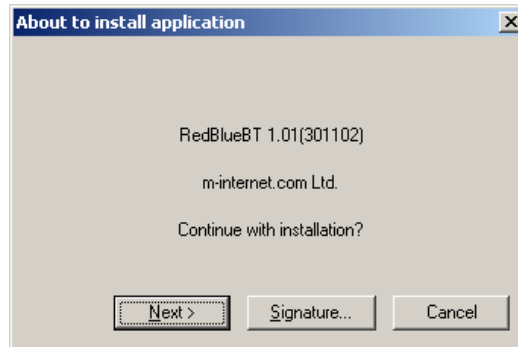

3 Installation

3.1 Using PC Suite for Nokia 7650/3650

a) Download the file **RedBlueBTNS60_101_EN.SIS** to your desktop PC

b) Connect your Nokia 7650/3650 to the PC using Infra-Red/Bluetooth (refer to your Nokia 7650/3650 manual)

c) Start PC Suite for Nokia 7650/3650

d) Click on "Tools -> Install device software" and select the downloaded file **RedBlueBTNS60_101_EN.SIS**. Click "Open" and the following screen will pop up to start the installation

e) When you see the above screen, just click "Install anyway" to continue the installation

f) The following screen will pop up. Click "Next" to continue

g) You will see another "Select disk" screen, just click "Next" to continue.

h) Then you will see another "Please read..." screen which displays the license agreement for you to read. You can either click "Yes" to accept it and proceed with the installation OR click "No" to abort the installation.

## 3.2 Using Infra-Red/Bluetooth Connection

Alternatively, you can directly "beam" the **RedBlueBTNS60_101_EN.SIS** to your Nokia 7650/3650 via Infra-Red or Bluetooth. It will be stored as a New Message in the inbox of your Nokia 7650/3650.

Open the New Message and the installation will start automatically. During the installation, you will be prompted to read the license agreement. You can choose to accept it and proceed with the installation OR reject it to abort the installation.
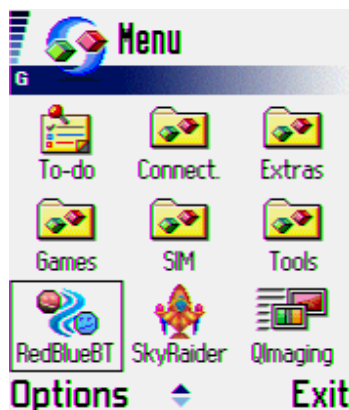

4 Removing *Red&BlueBT*

Once installed, an entry called "RedBlueBT" will be listed in the Applications Manager program under the "Tools" folder. Select this entry and use "Options->Remove" to remove the RedBlueBT application.
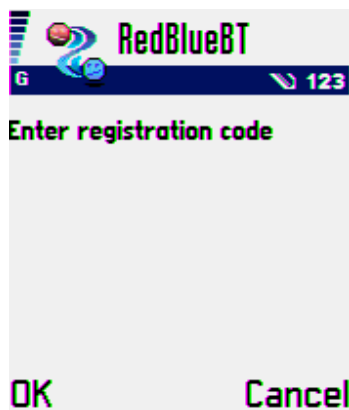

5 Starting *Red&BlueBT*

Press the Application Launch icon . In the Application menu,

navigate to the icon and press joystick button to start the game.

If it is the first time to run the **Red&BlueBT**, registration code is required:

Note:

Trial version does not require registration code, and certain limitation is applied to the trial version. Please refer to Readme1st.txt

For full version, your registration code is generated based on the IMEI (a unique serial number on the GSM phone) of your Nokia phone. You have to supply the IMEI to m-internet.com Ltd. to generate the registration code only for your device. Pressing ***#06#** on your phone keypad to get the IMEI and send email to support@m-internet.com for assistance. Make sure you can only install one copy in one device only for each license use!

6 How to play

6.1 Rules of the game

The aim of the game is to sandwich one or more of your opponent's pieces between your pieces. When this happens, the sandwiched pieces turn red or vice versa.

When no move is available, your turn is passed.

The winner will be the one with most pieces on the board at the end of the game.
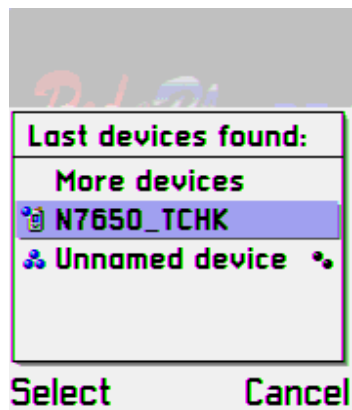

6.2 2-player mode

Red&BlueBT can be played over Bluetooth connectivity in 2-player mode. By using the built-in Bluetooth connectivity of Nokia 7650/3650, you can play the Othello game without wired connection within 10 meter area (may be varied).

Press left soft-key "Options" -> "Play 2-player", one must select "Wait opponent" and the other must select "Find Opponent". It is better to start "Wait opponent" first then "Find Opponent", Bluetooth will be switched on if it is off during play.

Then it will find the neighborhood of Bluetooth-capable device to start 2-player game:

Choose the correct Nokia 7650/3650 device and it will automatically start the 2-player game:

6.3 Difficulty level

You can choose difficulty level in "Settings". There are totally 3 difficulty levels in 1-player mode against Phone: Easy, Normal and Hard,

6.4 Controls

Use joystick to select piece, press joystick button to confirm your selection.

6.5 Settings

Difficulty (Easy, Normal and Hard)

Refer to Section 6.3

Movement (Smart/Standard)

When you choose Standard Movement, you can move your cursor on the board in any tile. If you choose Smart Movement, the software will guide you to the tile which you can take the legal move.

Audio (On/Off)

Sound effect ON or OFF during play.

Volume

Adjust the audio volume level, in effect only when Audio is ON.
